POLICY STATEMENT REGARDING THE ENVIRONMENTAL PROTECTION

Bucharest Airports National Company acknowledges its obligation to protect the environment. Our approach is that of sustainable business development, respectful towards the environment, aimed at protecting public health and the natural environment.

The involvement in international environmental programs transforms the company into a promoter of the integration of research and development, as well as the implementation of the results obtained on the entire airport platform.

Bucharest Airports National Company establishes, documents, implements and maintains an environmental management system, in accordance with the requirements of the ISO 14001 standard, and gives a great importance to reducing the impact of its activities on the environment, constantly trying to balance the requirements in the airport field with the requirements of environmental protection.

All the works carried out on the airport platform are based on the improvement of performance in the areas of noise control, reduction of pollutant emissions in air, water, soil, energy efficiency, waste management. We pay due attention to the identification and implementation of measures to combat climate change, to the sustainable use of resources and the prevention of accidental pollution.

To achieve these goals, we will continue to act by:

- Identifying and complying with the legal regulations applicable at the national level regarding the environmental protection, as well as the environmental practices and recommendations at the international level in the airport field;
- Adopting a policy to stimulate our partners, primarily air operators, in order to prioritize the use of technologies and equipment with low environmental impact;
- Including environmental considerations in all relevant decisions;
- Continuous improvement of environmental performance;
- Continuous evaluation of the environmental impact for the implementation of measures to reduce the carbon footprint by increasing energy efficiency, using green energy, optimizing the degree of occupancy of buildings, switching to a fleet of more efficient vehicles in terms of fuel consumption;
- Involving employees, business partners and airport infrastructure users in our efforts for a clean, healthy and safe environment, based on coherent environmental management programs;
- Maintaining an open dialogue with all interested parties regarding the proactive position of Bucharest Airports National Company regarding the promotion of best available practices in the field of environmental protection.
